SESSION INFORMATION

A. TARGET DATA:
Task/Target No. :92-140-P
Session No. :01

B. PERSONAL DATA:
Source No. :025
Monitor's No. :N/A
Beacon/Sender No. :N/A

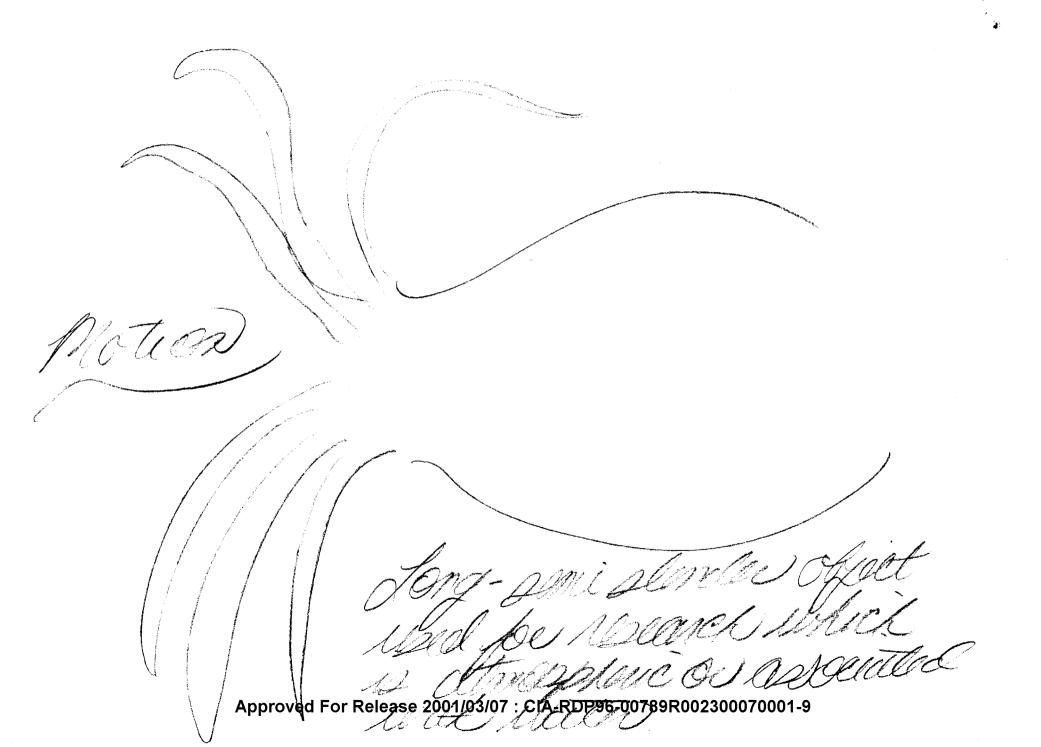

C. SESSION DATA:

Date Task Received :22 Dec 92
Session Date :22 Dec 92
Start Time :2:30
Stop Time :3:00
Method Used :ERV
Aids/Distractions (PIs) :N/A
Pre-session Hunches (AVs) :N/A
Date Summary Returned :22 Dec 92

D. EVALUATION DATA:
Viewer's Estimate :N/A
Evaluator's Estimate :

E. SESSION SUMMARY

A feeling of something in motion is at the target. This thing is exploratory in nature and may associated with water. The active motion of this thing is depicted on the attached sketch. Something is either moving under water perhaps in the ocean or may be in an atmosphere similar to space. This structure is fairly sizeable and is currently under study or used for research purposes. It reminds me of a squid in shape with long tenticle like feelers or fingers sprouting from one end of the structure providing it velocity. Running or gushing water sounds may be found in the vacinity.

92-1400

CPYRGHT

An eyeball on the enemy—day, night, or bad weather—is the final connection in the target-finding system mounted on the nose of the U.S. Army's Advanced Attack Helicopter. In simulated combat, test pilot Bill Norton (left) sees in his electronic monocle an image of an enemy tank (right, at top). As he turns his head to follow the target, sensors in the cockpit monitor the movement of his helmet and aim the weaponry automatically. At his command, a laser-guided missile fires, runs to its target, and destroys the tank (sequence at right).

TASKING SHEET
